Bayer BVF520 – 300 mm Extractor / Ventilation Fan with Hose

Portable 240 V ventilation/extraction fan (approx. 300 mm) with flexible ducting. Not a substitute for confined-space controls.

PRE-START CHECKS

- Electrical test-and-tag label present and in date (AS/NZS 3760); plug, lead and housing undamaged.
- Fan guards fitted and undamaged; blades turn freely; housing and stand stable.
- Ducting free of holes/kinks and firmly attached.

HOW TO OPERATE – BASIC STEPS

1. Place the fan on a stable surface, intake clear of debris and away from engine exhausts or contaminated air.
2. For supply ventilation, draw from clean fresh air; for extraction, run ducting to discharge outdoors away from people and air intakes.
3. Plug into an RCD-protected outlet and switch on; check airflow.
4. Keep hands, clothing and loose items away from the guards.

KEY HAZARDS

- Electric shock (damaged leads, wet conditions).
- Not rated for flammable/explosive atmospheres unless marked – do not use where flammable vapours or dust may be present.
- False sense of safety in confined spaces – ventilation alone does not make a confined space safe.
- Trip hazard from leads and ducting.

REQUIRED PPE

- As required for the task; hearing protection if prolonged use close to the fan.

REFUELLING / POWER / CHARGING

- Mains 240 V – Plug into an RCD-protected outlet (30 mA) or use a portable RCD; test the RCD button before use. Use only tagged, heavy-duty extension leads, fully unwound, kept out of water and traffic.

STORAGE & RETURN

- Switch off and unplug; let the fan stop before moving. Return with ducting coiled.
- Return with all accessories supplied. Report any damage, fault or near-miss at return – do not attempt repairs.

MANUFACTURER MANUAL & SDS

- **Manual:** Bayer BVF520 manual: Manual available on request.
- **SDS:** Not applicable – no hazardous substances supplied with this item. SDS for any products you use with it (e.g. cement, paints) must be obtained from that product's supplier.

Licence / competency: No licence required. Confined-space entry requires a permit, atmospheric testing and trained workers under the WHS (General) Regulations 2022 (WA).

EMERGENCY: call 000 (Police/Fire/Ambulance) • Poisons Information 13 11 26 • Breakdown or help: see the Contact page at foothillshire.com.au • Site first aider / supervisor: _____

IMPORTANT – READ BEFORE USE. This sheet is a summary only and does not replace the manufacturer's operator manual. The hirer must read, understand and follow the manufacturer's manual and all warning labels before use, and must ensure every operator is trained, competent and – where required – licensed for this equipment and task, as required by the Work Health and Safety Act 2020 (WA) and the Work Health and Safety (General) Regulations 2022 (WA). Do not use equipment that is damaged, untagged or out of inspection date – stop and contact Foothills Hire. Foothills Hire is a business name held by Foothills Industries Group Pty Ltd, ABN 38 688 848 302.
